3539 E. 52nd Street Packet - NEEDS COVER 092116.pdf

Made another copy, attached. Opens for me. I'm thinking it was just a problem with e-mail traffic rather than the document itself. Let me know if this one still won't open.

Ryan, I couldn't open the 3539 document. It says it is corrupt.

Thanks.

Michelle,

Here are the two pdf examples of the combined attachments you requested for a final review. In Attachment 5 I added the English and Spanish ATSDR fact sheets before the metals links page on these two examples, per our discussion. I will need to do that for the rest as well.

As you requested, I did a quick review of the Fact Sheet and Cover Letter. I found a few small suggestions to make in the attached version of Fact Sheet. (Some edits may not show up unless Word is changed from "Simple Markup" to "All Markup", my version keeps defaulting to simple markup).

I didn't find anything amiss while reviewing the Cover Letter. However, I did notice it indicates near the bottom of the letter that the residents will be notified in advance of any removal activities at the source site. We basically only have next week to prepare for the removal which is tentatively scheduled to begin Monday 10/3. If it hasn't been planned already, there will probably need to be some discussion and preparation for how the notifications will be made (written letter left in mailboxes? knock on doors? phone calls?), and who will do the notifications (CPH? CICs?) and when (next week?).

That's all I've got for now, let me know if you need anything additional.

Ryan
